

# GTK 4

Benjamin Otte <[otte@gnome.org](mailto:otte@gnome.org)>  
Matthias Clasen <[mclassen@redhat.com](mailto:mclassen@redhat.com)>

# GTK 3.0

- 6447 commits
- “5” months
- 221 committers
- 8 active devs

# The past

- Cairo drawing
- dynamic GDK backends
- GdkDevice / XI2
- CSS theming
- width for height layout
- align + expand
- GtkGrid, GtkAppChooser

# GTK 3.2

- 2067 commits
- 6 months
- 130 committers
- 4 active devs

# The present

- New GDK backends: Wayland & Broadway
- File chooser improvements
- Accessibility
- improved CSS theming
- Performance
- Testing

# GTK 4.0

- 0 commits (yet)
- 0 months (yet)
- 0 committers (yet)
- 0 active devs (yet)

# The future

- Animations
- Effects
- Transformations
- Event bubbling
- No more GDK windows

**GTK+ is a multi-platform  
toolkit for creating  
graphical user interfaces.**

# “multi-platform” ?

- OS
- input methods
- form factor

# “creating GUIs”?

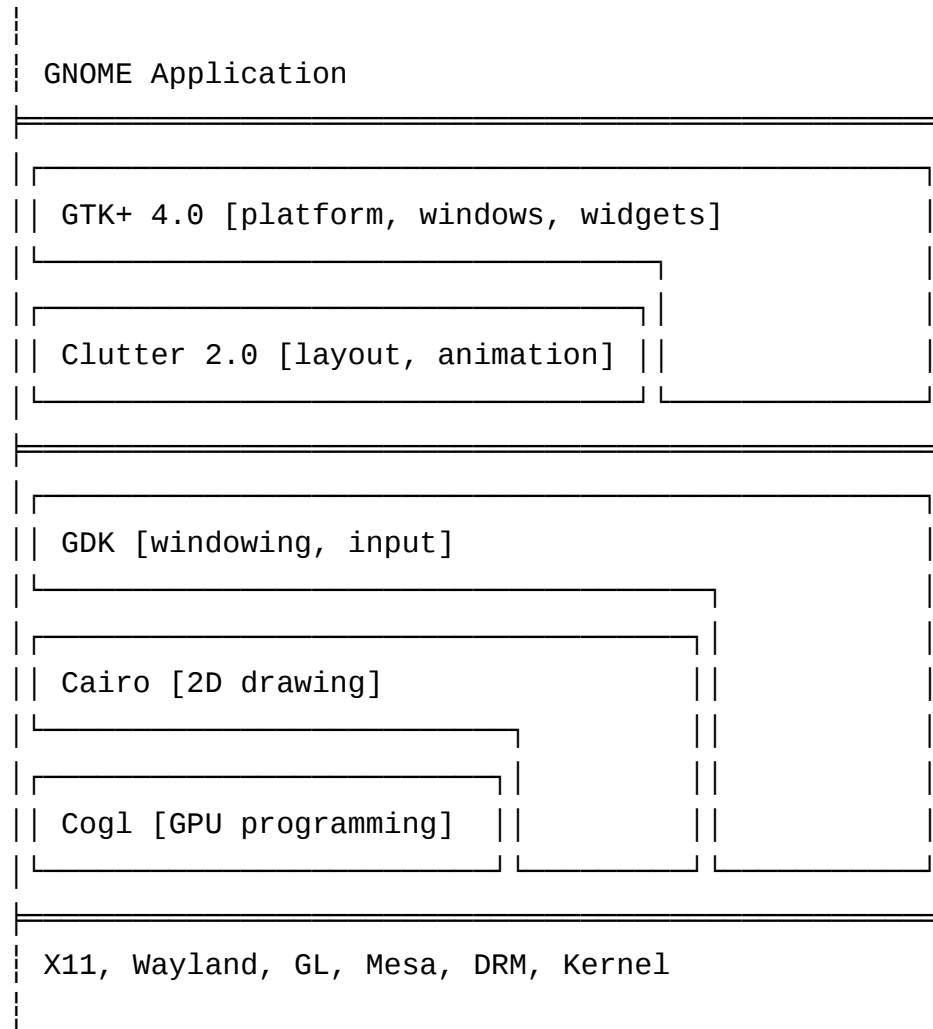

- Office suites
- Rapid Application development
- Small applications
- Multimedia

# What about Clutter?

# Maybe this?

# We need help

- Give feedback!
