About Calligra

**Words**
is an intuitive word processor application with desktop publishing features. With it, you can create informative and attractive documents with ease.

**Kexi**
for integrated data management

**Plan**
for project planning

**Tables**
is a fully-featured spreadsheet application. Use it to quickly create spreadsheets with formulas and charts, to calculate and organize your data.

**Flow**
for diagramming and flowcharting

**Stage**
is a powerful and easy to use presentation application. You can dazzle your audience with stunning slides containing images, videos, animation and more.

**Karbon**
for drawing vector graphics

**Krita**
for painting and image editing

Interesting side projects

ODFKit

About

ODFKit is a research project that makes Open Document Format (ODF) support available to web developers.

Getting involved

The ODF source code is hosted at Gitorious. You can contribute to development and share your ideas with others.

Examples

There are two example programs for ODFKit: a free software project, WebODF, and a package for Windows (MSVC runtime).

Example 1: Pics2Slides

WebODF: work with your office files in the cloud, on the desktop and on your mobile.
Meshing together
Harmattan Office on N9/N950

Unified User Interface to view and interact with office documents

Supported File Formats
- Text Documents (odt, doc, docx, txt)
- Presentations (odp, ppt, pptx)
- Spreadsheets (ods, xls, xlsx)
- PDF

Implementation
- Backends
  - Calligra for office documents
  - Poppler
- Frontend
  - Unified UI developed by Nokia
Supported File Formats

• Text Documents (odt, doc, docx, txt)
• Presentations (odp, ppt, pptx)
• Spreadsheets (ods, xls, xlsx)
• PDF
Implementation

Backends

- Calligra for office documents
- Poppler for PDF

Frontend

- Unified UI developed by Nokia
Making of Harmattan Office

Aspects

- With par with other solutions (Benchmarking)
- Open co-operation with community (Upstream)
- Innovation in the space of Mobile Office (FreOffice / Calligra Mobile)
Making of Harmattan Office

Teams

- Core Team
- Community
- Open innovation in Mobile Office Students
Thanks

Special thanks to Calligra and Poppler

- Friendly to work with
- Very professional
- Very passionate and committed

Very exciting project for Nokia Team to work on
